

# Access Rigging Services

## Corporate Profile

---

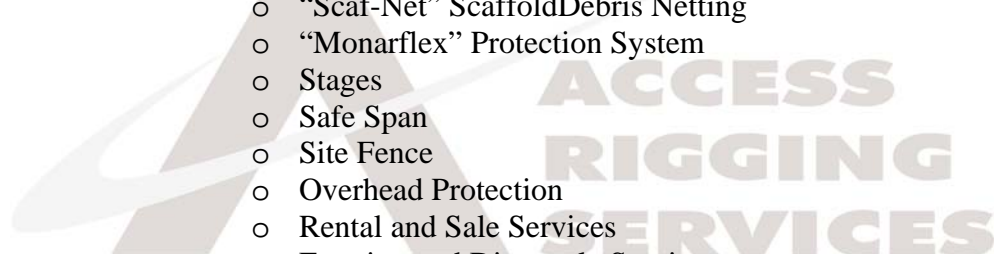

Access Rigging was originally formed in 1998 to supply a safe and affordable scaffolding erection and dismantle service to Eastern Ontario / Western Quebec area contractors.

Through customer demand, a full scaffolding sales and rental service was added to complement the labour services offered.

Responding to customers' needs for professional installation, Access Rigging now designs, erects and dismantles any and all of its scaffolding products and has estimating and technical services to assist customers with bidding and on-site applications.

Due to our commitment to our customers, we have increased our product lines so as to provide more services and products. Below is a summary of what Access Rigging can do for your company.

- Standard Tubular Frame Scaffolding
- System Scaffolding (Rosette type)
- Tube and Clamp Scaffolding
- "Super Chute" Debris Systems
- "Scaf-Net" Scaffold Debris Netting
- "Monarflex" Protection System
- Stages
- Safe Span
- Site Fence
- Overhead Protection
- Rental and Sale Services
- Erection and Dismantle Services
- Engineering and Design Services

Let one of our experienced sales staff research which product best suits your access needs at the most efficient and competitive rate.

We look forward to working with you in the future.
